INNITOU 2001

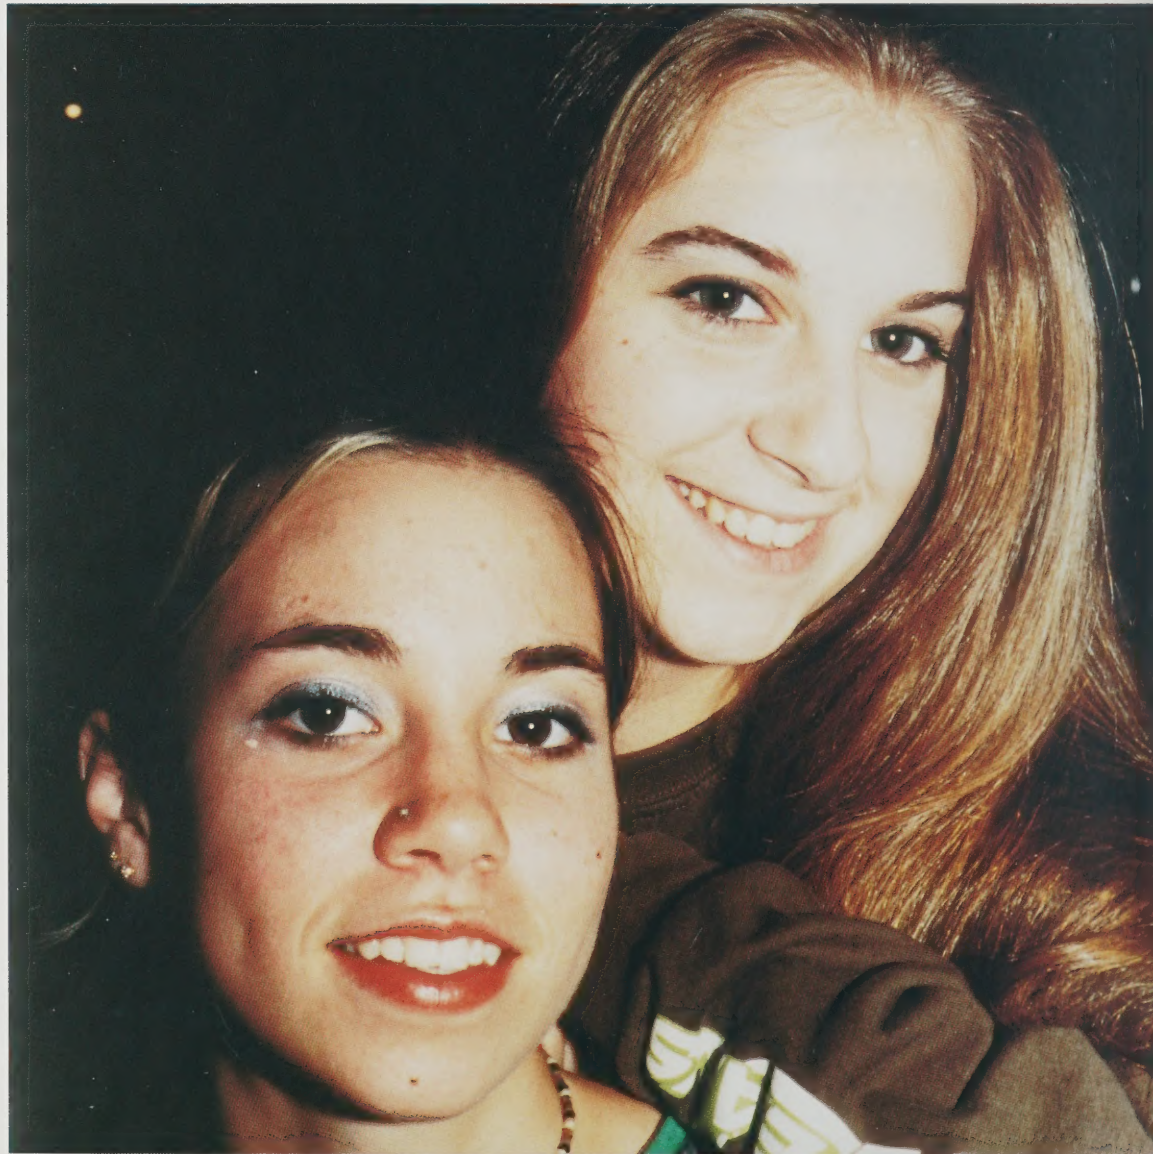

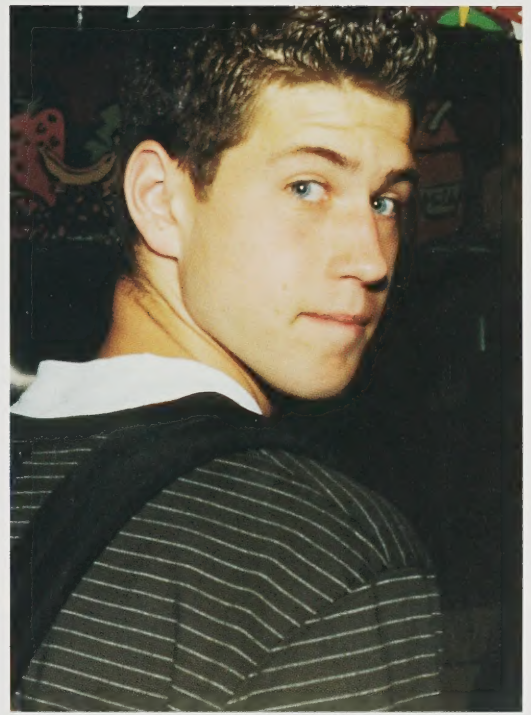

WOBURN *high school*

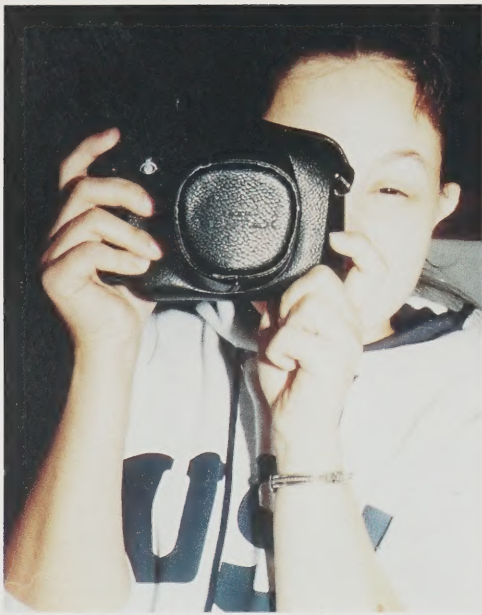

88 Montvale Avenue
Woburn, Massachusetts

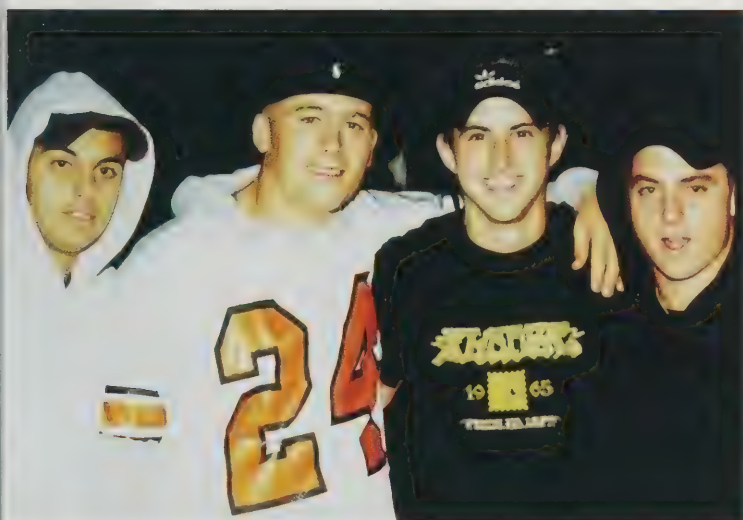

DEDICATION

Since we first entered Woburn High, The Class of 2001 has had the good fortune to have been associated with a number of people who have helped us to grow educationally and personally. Of this group, one person, in particular, stands out thanks to his unselfish, friendly and sincere manner. He has been a friend as well as a teacher and has always shown a genuine interest in our success.

Dear Seniors,

On behalf of the staff of Woburn High School let me congratulate you on your graduation with the class of 2001. I am sure the four years have gone by quickly. Your class has made an indelible mark on the history of the school with your citizenship, your academic performance, and your accomplishments on the athletic field.

You are emerging from the protective cocoon of high school and coming into a world of challenges and opportunities. We hope we have given you the basics to help you earn success in that world. What you do now is all about you.

Regardless of your level of achievement in high school, the door is opening to a new beginning. Take the lessons you've learned here and use them to help you grow. May you always find yourself measured by the determination of your effort and quality of your performance and may you always be proud to call yourself a "Tanner".

Good luck!

Software Pundits

pun·dit [pun'·dit]

1. An enlightened person
2. A scholar and teacher
3. One who gives opinions in an authoritative manner

True pundits are rare in any occupation. But among software development professionals, pundits are as unique as they are exceptional. Software pundits are inspired to attain nothing short of excellence as they strive to achieve truly “enlightened” approaches to software development and successful solutions.

So what kind of a company has the audacity to call itself,
“Software Pundits?”

Only one!

- Only a company trusted by technology leaders like Cisco, Sun, EMC, Lotus, and Fidelity Investments to recommend and deliver software solutions crucial to their reputations and success.
- Only a company whose “enlightened” approach to software development provides a wide variety of flexible, cost-effective solutions spanning systems development; systems integration; applications development and contract programming.
- Only a company professionally staffed with full-time technology experts and experienced project managers trained in the proven methodologies required to successfully deliver your solution ... on time and on budget!
